Biochemistry is the study of the chemistry of the living tissues of plant and animal life.

Boston is not suggesting that ASIMOV is ROBPROF as [redacted] has advised that ROBPROF is in the field of Microbiology. However, as in the case of [redacted] he should be considered as a possibility in light of his background, which contains information ipimical to the best interests of the United States. ~~(S)(u)~~

[redacted] Massachusetts General Hospital, Boston, Mass., was contacted on 6/14/65 and he advised [redacted] is acquainted with [redacted] but that [redacted] is unknown to him. He further advised that [redacted] is not aware that [redacted] is acquainted with or has associated with any Soviet nationals. ~~(S)(u)~~

Boston is closing the case on [redacted] and is placing the ROBPROF case in a pending inactive status until such time as more definitive descriptive data is received from [redacted] or other sources as to his identity. In the interim Boston will remain alert during pursuit of general investigative duties in other cases of this nature for additional suspects in the ROBPROF case. ~~(S)(u)~~
